

Index

- H_Λ^Φ : hamiltonian, 10
- Ψ_a : interaction from local operator, 18
- $\alpha_{\Lambda,t}^\Phi, \alpha_t^\Phi$: evolution operators, 28
- \mathcal{A} : algebra of quasi-local operators, 10
- \mathcal{A}_X : space of operators in $X \subset \mathbb{Z}^d$, 9
- \mathcal{A}_{Λ^c} , 43
- \mathcal{A}_h : hermitian quasi-local operators, 10
- \mathcal{A}_{loc} : algebra of local operators, 10
- $\mathcal{B}(\mathcal{H})$: bounded operators, 3
- $\mathcal{B}_2(\mathcal{H})$: Hilbert-Schmidt operators, 8
- \mathcal{H} : Hilbert space, 3
- \mathcal{I} : interactions with finite norm $\|\cdot\|$, 10
- \mathcal{I}_r : interactions, 10
- \mathcal{L}^Φ : tangent functionals of pressure, 18
- $\mathcal{G}_{\text{tr.inv.}}^\Phi$: infinite-volume Gibbs states, 20
- $\langle \cdot \rangle$: state, 7
- $\hat{\mathcal{A}}$: subspace of quasi-local operators, 32
- a_Ψ : operator from interaction, 19
- $p_\Lambda(\Phi)$: pressure for interaction Φ , 15
- $s(\langle \cdot \rangle)$: mean entropy for state $\langle \cdot \rangle$, 24
- \mathcal{O} , 43

- algebra at infinity, 43
- Bogolubov's inequality, 72

- chessboard estimate, 85
- classical interaction, 35
- classical state, 36
- clustering, 37
- consistent, 10

- decomposition of states, 39
- density operator, 7
- Dirac notation, 4
- DLR equations, 36
- Duhamel formula, 87
- Duhamel inner product, 71

- entropy, 23
 - von Neumann, 23
 - convexity, 90
 - relative, 90
- ergodic state, 38
- evolution operator, 28
- extremal state, 37

- Falk-Bruch inequality, 72
- free energy, 23

- Gibbs state
 - finite volume, 11
- Gibbs variational principle, 25
- GNS representation of states, 41
- Golden-Thompson inequality, 5

- Hölder inequality for matrices, 5
- hamiltonian, 10
- Hilbert-Schmidt norm, 8, 9

- interaction, 10

- Klein inequality, 6
- KMS condition, 32
 - finite volume, 27

- Lieb's concavity theorem, 89
- linear span, 3
- local observable, 10

- mixed state, 8
- multicommutator expansion, 29

- normalised trace, 9

- observable
 - local, 10
 - quasilocal, 10

- Pauli matrices, 51
- Peierls inequality, 7
- Peierls-Bogolubov inequality, 6
- periodic boundary conditions, 16
- Pinsker's inequality (quantum), 62
- pressure, 14
 - infinite volume, 15, 17
- pure state, 8

- quasi-local observable, 10

- relative entropy, 90

- short-range correlations, 37
- spin
 - operators, 51
 - rotations, 53
- state
 - classical, 36
 - cluster point, 11
 - decomposition, 39
 - finite volume, 7
 - Gibbs variational principle, 25
 - infinite volume, 11
 - mixed, 8
 - pure, 8
 - tangent functional, 20

- tangent functional to the pressure, 18
- tensor product, 3
- Trotter formula, 87

- van Hove sequence, 17
- von Neumann entropy, 23
